Special Focus: Applied Science and Engineering Innovation

2013 International conference on Applied Science and Engineering Innovation (ASEI2013) will be held in Beijing, China. The mission is to make an ideal platform for the Engineers/Researchers for sharing and exchanging professional, technical and academic knowledge on any aspects of Applied Science, Engineering and Technology. The overall goal of the conference is to promote research and professional activities for sustainable development in different branches of Applied Science, Engineering and Technology for facing the challenges of 21st century.

From the ASEI2013, we have selected top papers based on the quality and relevance to the scope of the International Journal of Emerging Technologies in Learning. These papers are selected based on the originality in content and the authors were asked to revise the papers in accordance with the reviews. Hence we are convinced that the issue has high quality papers. We are thankful to the Chief Editor and the publishers for bringing out this special issue.
