[\[www.rev-conference.org/REV2010\]](http://www.rev-conference.org/REV2010)

June 29 – July 2, 2010 where the first day is devoted to a social outdoor event

KTH – Royal Institute of Technology,
Stockholm, Sweden

REV 2010 is the seventh in a series of annual events concerning the area of remote engineering and virtual instrumentation. The REV conferences are the annual conferences of the International Association of Online Engineering (IAOE) (www.online-engineering.org). REV2010 will be held at Kungliga Tekniska Högskolan (Royal Institute of Technology, KTH) in Stockholm. The general objective of this conference is to demonstrate and discuss fundamentals, applications and experiences in the field of remote engineering and virtual instrumentation. With the globalization of education the interest in and need of teleworking, remote services and collaborative working environments now increases rapidly. Another objective of the symposium is to discuss guidelines for education in university level courses for these topics. REV 2010 offers an exciting technical program as well as academic networking opportunities during the social events.

Topics of Interest

Topics of the conference will include (but are not limited to): Virtual and remote laboratories • Remote process visualization and virtual instrumentation • Remote control and measurement technologies • Online engineering networking and grid technologies • Mixed-reality environments for education and training • Education and operation interfaces • usability, reusability, accessibility • Demands in education and training, e-learning, blended learning, m-learning, and ODL • Open educational resources (OER) • Teleservice and telediagnosis • Telerobotics and telepresence • Support of collaborative work in virtual engineering environments • Teleworking environments, telecommunity and their social impact • Present and future trends, including social and educational aspects • Innovative organizational and educational concepts for remote engineering • Applications and experiences • Standards and standardization proposals • Products.

Posters / thematic workshops / tutorials / technical sessions, as well as interactive demonstrations and exhibitions, may also be proposed. Prospective organizers of other REV2010 events are encouraged to contact the conference chair.
