

REV 2011 is the eighth in a series of annual events concerning the area of remote engineering and virtual instrumentation. The REV conferences are the annual conferences of the International Association of Online Engineering (IAOE) (<http://www.online-engineering.org>). REV2011 will be organised in Brasov by Transilvania University. The general objective of this conference is to demonstrate and discuss fundamentals, applications and experiences in the field of remote engineering and virtual instrumentation. With the globalization of education the interest in and need of teleworking, remote services and collaborative working environments now increases rapidly. Another objective of the symposium is to discuss guidelines for education in university level courses for these topics. REV 2011 offers an exciting technical program as well as academic networking opportunities during the social events.

Topics of Interest

Topics of the conference include (but are not limited to): Virtual and remote laboratories ▪ Remote process visualization and virtual instrumentation ▪ Remote control and measurement technologies ▪ Online engineering ▪ Networking and grid technologies ▪ Mixed-reality environments for education and training ▪ Education and operation interfaces, usability, reusability, accessibility ▪ Demands in education and training, e-learning, blended learning, m-learning, and ODL ▪ Open educational resources (OER) ▪ Teleservice and telediagnosis ▪ Telerobotics and telepresence ▪ Support of collaborative work in virtual engineering environments ▪ Teleworking environments ▪ Telecommunities and their social impacts ▪ Present and future trends, including social and educational aspects ▪ Human computer interfaces, usability, reusability, accessibility ▪ Innovative organizational and educational concepts for remote engineering ▪ Standards and standardization proposals ▪ Products ▪ Military wireless applications ▪ Information security ▪ Telemedicine ▪ Renewable energy ▪ Applications and experiences.
