Automation and its Applications in Mechanical Engineering

We are happy to bring out this special issue on **Automation and its applications in Mechanical Engineering**. We have organized the 2012 International Conference on Mechanical Engineering, Automation and Material Science (MEAMS 2012) at China which proved to be a good platform for engineers, scientists, researchers in Mechanical Engineering and Automation.

With the rapid development of Mechanical technology, researchers in all fields begin to discuss some new ideas connected with Mechanical Engineering and Automation. The MEAMS 2012 has given a valuable opportunity for researchers, scholars and some scientists to exchange their ideas face to face together. MEAMS2012 is very special for its strong organization team, dependable reputation and wide sponsors all around the world.

From the MEAMS, we have selected top 13 papers based on the quality and relevance to the scope of the **International Journal of Online Engineering**. These papers are selected based on the originality in content and the authors were asked to revise the papers in accordance with the reviews. Hence we are convinced that the issue has high quality papers. We are thankful to the Chief Editor and the publishers for bringing out this special issue.

Dr. Professor Gongfa Li College of Machinery and Automation,
Wuhan University of Science and Technology, China

Dr. Tinggui Chen College of Computer Science & Information Engineering
Zhejiang Gongshang University, China

Dr. Professor Guozhang Jiang College of Machinery and Automation,
Wuhan University of Science and Technology, China

Guest Editors

Dr. Gongfa Li received the Ph.D. degree in mechanical design and theory from Wuhan University of Science and Technology in China. Currently, he is a professor at Wuhan University of Science and Technology, China. His major research interests include modeling and optimal control of complex industrial process, mechanical engineering.

Dr Tinggui Chen is an Assistant Professor of the School of Computer and Information Engineering, Zhejiang Gongshang University, P. R. China. He received his Ph. D degree in engineering management from Huazhong University of Science and Technology.

Guozhang Jiang received the Ph.D. degree in mechanical design and theory from Wuhan University of Science and Technology, China, in 2007. He is a Professor of Industrial Engineering, and the Assistant Dean of the college of machinery and automation, Wuhan University of Science and Technology. Currently, his research interests are computer aided engineering, mechanical CAD/CAE and industrial engineering and management system.
