Online Engineering and Intelligent Automation

2013 Chinese Intelligent Automation Conference (CIAC2013) is organized by the Intelligent Automation Committee of Chinese Association of Automation (CAA), Yangzhou University, Robot Competition Working Committee (CAA), Intelligent Control and Intelligent Management Committee (CAAI) and Jiangsu Association of Automation. The aim objective of CIAC2013 is to provide a platform for researchers, engineers, academicians as well as industrial professionals to present their research results and development activities in intelligent automation. This conference provides opportunities for the delegates to exchange new ideas and application experiences face to face, to establish business or research relations and to find partners for future collaboration. From the CIAC2013, we have selected top papers based on the quality and relevance to the scope of the International Journal of Online Engineering. These papers are selected based on the originality in content and the authors were asked to revise the papers in accordance with the reviews. Hence we are convinced that the issue has high quality papers. We are thankful to the Chief Editor and the publishers for bringing out this special issue.
